Overview

Product Description

The XW1604 / XW1608 1U rackmount console is the ideal solution for ETC specialized rack, 5G rack, network specialized rack and standard server rack. Featuring an integrated 15.6" LCD display, full-99 key keyboard and touchpad, all in a 1U rackmountable housing, it supports the shortest mounting depth: 360mm. It also features a dual power supply redundancy, largely improve the work efficiency of the whole KVM and server system.

It is easy and fast to install the KVM console; you just need to connect corresponding cables to the right ports of KVM and its module without software configuration. This console is designed with two anti-vibration fixing screws on the front panel to prevent the console during transportation and operating.

Product Features

- 15.6" FHD TFT LCD monitor, high brightness, high resolution
- Constructed of heavy-duty steel in a 1U housing
- Short depth: 360mm
- Ultra slim 99 keys keyboard with small numeric keyboard
- High resolution and high flexibility with touchpad; with two function buttons and scroll wheel
- Dual power supply redundancy design

Switch Functions

- A single USB console controls up to 4 or 8 computers
- Supports wireless keyboard and mouse from different suppliers
- Two level password security – support 1 administrator user and up to four users, and administrator user can give user the right to access and view the server.
- Users can set up different hot keys(【Scroll Lock】/【Caps Lock】/【F12】/【Ctrl】), auto scanning time, port display time, log out time, buzzer on/off and mouse on/off according to their different needs
- Broadcast mode – operations simultaneously performed on all selected computers
- Multiplatform support – Windows, Linux, Mac and Sun
- Supports multimedia USB keyboard(PC, Mac and Sun)
- USB or PS/2 keyboard emulation – computer boot even the console focus is else where
- Convenient computer switching via front panel pushbuttons, hotkeys, OSD menu
- Automatically shows the computer position on the front panel LED screen under daisy chaining connection without DIP set by hand

- Auto scan feature for monitoring user-selected computers
- Hot pluggable – add or remove computers without having to power down the switch
- Quickly select your computer by naming the server or inputting SN number of the server

Hardware Installation

Rack Mounting

A standard rack mounting kit is provided to mount the LCD console in a depth of 266-400mm in a standard 19" rack. (For other depth, the rear bracket can be customized accordingly, check figure 2-2.1 and 2-2.2)

With one person hold the switch in place and the other person slides the L bracket into the switch's side mounting brackets from the front to the back, then screws the brackets to the rack. (See below installation drawing)

2-1.1 rack mounting (1)

2-1.2 rack mounting (2)

For depth: 300-400mm, move back the rear brackets before installation.

2-1.3 rack mounting (3)

For rack without rear vertical frame, need to install L stand.

L type bracket

2-1.4 rack mounting (4)

Installation instruction

- 1) Make sure the rack mounting KVM switch has been connected to the ground (① in the diagram)
- 2) Connect KVM switch with the computer according to ② in the diagram
- 3) Connect power cable to KVM port as shown in ③ in the diagram
- 4) If extra console required, connect the display port ④ in the diagram. The USB port for keyboard and mouse are in the front of the LCD console.

Cables

No.	Cable	Model	Connector
①	KVM Cable – PS/2	CH-1800P (1.8m) CH-3000P (3m) CH--5000P(5m)	PC or Server port: Keyboard: 6 pin MIN-DIN male Mouse: 6 pin MIN-DIN male Display: 15 pin HDB male
			KVM port: 15 pin HDB male
	KVM Cable – USB	CH-1802U (1.8m) CH-1806U(bent-head/ 1.8m) CH-3001U (3m) CH-5001U (5m)	PC or Server port: USB port: USB A TYPE(female) Display port: 15 pin HDB male
			KVM port: 15 pin HDB male

Table 1.1 connecting cables

To ensure signal integrity and simplify cable layout, we strongly recommend you using high quality cables with different length as shown in above table.

Opening the console

- Pull it out, and the rails will be locked automatically;
- Release the front panel screw

2-2.1 unlocking

- Rotate the LCD module all the way back to expose the LCD screen, the LCD module can be rotated up to 125°. (Recommend to 120°.)

2-2.2 rotate angle of the console

- The KVM makes two “beep” sounds and the LED flashes four times after power on. The LED shows 01 and a screen similar to the below pops up for you to enter the user name and password.

2-2.3 password window

- LCD panel is powered on when the power LED is green.
- Power on computer or server after power on KVM and you will see green light at each port.
- The factory default password is blank, it will be OK after double click “Enter”.

Closing the console

- Close the LCD display panel and the power automatically shut down.
- Push the release catch in the direction of the arrow, push the LCD panel all the way in until it automatically lock up.

2-2.4 open angle of the console

	Num Lock	Press this key exits OSD menu

Table 1.5

F1: ADM

● Menu overview

Operating instructions

- 1) Press **[F1]** or **[←]** **[→]** enters the F1 submenus.
- 2) Press **[↑]** **[↓]** moves the highlight bar to select the submenu.
- 3) Press **[Enter]** selects and exits ADM menu.
- 4) Press **[Esc]** cancels the operation and exits ADM menu.

● Menu explanation

1. Set User Login—Press [Enter] and select Set User Login, a screen as below diagram 4-1.1 appears:

One administrator and four users account can be set (the account and the password are no more than 16 characters)

4-1.1

Enter
→

4-1.2

Note: You can set up an account and password according to diagram 4-1.2, then a “User setup ok” pops up showing you have done your set, and “Password Not Match” pops up, you need to type in your password again as you did in your first type.

2. Set accessible—press [Enter] and select Set Access Permission, then below menu appears: (diagram 4-1.3):

4-1.3

Menu	Explanation
FULL	Full access function to the station and can do any operation to the ports
VIEW	View only function, you can only view the port but you can't operate it if set this function.
NULL	If you set this function, the port will be not displayed on the user's OSD menu

Note: The administrator always has full access to all the ports.

4-1.4

4-1.5

Eg.1). If you want to set access permission of [User1], press **[Space]** to choose the permission options you need to set.

2). [User1] log in OSD menu, as shown in diagram 4-1.5.

3. BRC Mode - Press **【Enter】** to enter the BRC mode. Enter the main menu, press **【F7】** to add or remove a port that need broadcast function. When BRC mode is effect, a speaker symbol appears in QV column. (See below diagrams). While BRC mode is in effect, we can operate multiple computer ports simultaneously, but the mouse is not function normally.

4-1.6

4-1.7

- 1) Open BRC mode
【F1】->BRC Mode OFF->press **【Enter】**--> BRC Mode ON (see diagram 4-1.6)
- 2) Open the port that need broadcast function
 Press **【↑】【↓】**key—>select the port that need broadcast function →press **【F7】** →a speaker symbol appears in the QV column which shows the port has entered broadcast mode.
- 3) Close the broadcasting port
 Press **【↑】【↓】** key—>select the port→press **【F7】** →exit BRC mode and the speaker symbol disappears
- 4) Exit BRC mode
 Invoke OSD main menu → **【F1】** ->BRC Mode ON ->press **【Enter】** --> BRC Mode OFF, the KVM exits BRC mode(diagram 4-1.8)

FAQ

1. The KVM console do not work when I connect and use the console for the first time.

Solutions:

Please re-connect the KVM console according to below steps:

- 1) Disconnect all the signal and power cables connected to KVM.
- 2) Then power on KVM and you hear the boot indicating sound from the beeper, a screen automatically pop up for you to enter the user name and password.
- 3) Type in the correct user name and password, the original password is clicking Enter twice, then the OSD main menu pop up on the screen.
- 4) Check the KVM console and make sure it can normally switch ports.
- 5) Connect one server (PC) to one of the KVM ports with signal cable and check port switching function, check the keyboard and mouse, if they are not working, try to re-start the server (PC).
- 6) After successfully finishing all above steps, gradually add server (PC) to this console until meet your need.

2. There is no pop up window to type in user name and password or the pop up window is not normally displayed.

Solutions:

- 1) Check the AC/DC output.
- 2) Make sure you have heard the indicating sound and the keyboard LED is on after starting up the computer.
- 3) Check the LED power and make sure the LED signal cable has connected to the KVM console.

3. I can't log in the KVM system after starting computer.

Solutions:

- 1) Make sure the KVM keyboard is working, the user name and password is correct. The default value is blank, you can log in after press Enter.
- 2) If you still can't log in the system, try to connect an external USB or PS/2 keyboard.(The original default value is blank, you can log in after double clicking Enter)

4. I can't switch from one port to another after logging in the KVM system.

Solutions:

- 1) Invoke the OSD main menu and check the user name on the top left, make sure the user has got the access permission from the administrator.
- 2) Please contact the distributor or the KVM manufacturer.

5. Bad display quality of PC screen.

Solutions:

- 1) Check the signal cables, make sure they are connected.
- 2) Reset the monitor's display settings.

6. When I switch to one port, the keyboard and mouse do not work.

Solutions:

- 1) Make sure you have exited the OSD menu.
- 2) Invoke the OSD main menu and check the user name on the top left, make sure the user has got the access permission from the administrator.
- 3) Pull out the USB port of the server (PC) then plug in.
- 4) If you connected the PC with PS/2 port, try to re-start the server (PC).

7. I can't invoke the OSD main menu.

Solutions:

- 1) Check the keyboard to make sure it is working.
- 2) Double click **【 Scroll_Lock 】** .
- 3) Double click **【 F12 】**
- 4) Double click **【 Caps Lock 】**
