MHL™ Connectivity

This projector supports MHL™ connectivity (via an MHL™/HDMI® port), which means it can display uncompressed HDMI® audio/video from any smartphone or mobile device that supports MHL™. This projector will also charge the battery of the connected mobile device. The user can also wirelessly connect this projector to such a mobile device by inserting Acer's unique MHL™ wireless adapter into the projector's MHL™/HDMI® port. In this way, this projector can wirelessly display the audio/video content of any device that supports Miracast™ Wi-Fi Display, WiDi Wireless Display or DLNA.

Presentation to Go

The K335 offers 2 GB of internal memory, a micro SD card reader and USB multimedia readers that enable the Presentation To Go function: Full access to photos, videos, music and Office documents (PowerPoint, Excel, Word and PDF), directly from the projector — no need for a laptop PC or video player!

Acer ColorSafe II

Acer projectors that feature ColorSafe II are virtually immune to color decay — the yellow or green tint of images displayed by some projectors that have been used for extended periods of time. Acer projectors with ColorSafe II take advantage of DLP® technology and Acer's unique optics-based color-compensation technology to guarantee picture integrity even after prolonged use. The resulting extended lifespan and consistent image quality lower the total cost of ownership.

Acer EcoProjection

Acer EcoProjection with ExtremeEco is a complete environment-friendly power management solution that reduces standby power consumption by up to 70%. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.
